In 2002, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 16 points.
- In 2005, the score gap between students at the 75th percentile and students at the 25th percentile was 43 points. In 2002, the score gap between students at the 75th percentile and students at the 25th percentile was 42 points.

Reading Scale Scores at Selected Percentiles

Scores at selected percentiles on the NAEP reading scale indicate how well students at lower, middle, and higher levels of the distribution performed.

- # The estimate rounds to zero.
- * Significantly different from 2005.

- ‡ Reporting standards not met.
- ↑ Significantly higher than 2003. ↓ Significantly lower than 2003.
- ¹ Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates across years for students with disabilities (4% nationally in 2005) and English language learners (1% nationally in 2005) in the NAEP samples. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
- ² "Other Jurisdictions" refers to the District of Columbia and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for free/reduced-price lunch and the "Unclassifed" category for race/ethnicity are not displayed.
